Sequence 12872, Application US/09864761
Patent No. US2002004876341
GENERAL INCORMATION:
APPLICANT: Penn, Sharron G.
APPLICANT: Penn, David R.
APPLICANT: Hanzel, David R.
APPLICANT: Chen, Wensheng
TITLE OF INVENTION: GENE EXPRESSION ANALYSIS BY MICROARRAY
TITLE OF INVENTION: GENE EXPRESSION ANALYSIS BY MICROARRAY
CHER FEFERENCE: Acomica-X-1
CHER TAPLICATION NUMBER: US/09/864,761
CURRENT APPLICATION NUMBER: US 60/180,312
PRIOR PLING DATE: 2000-02-04
PRIOR APPLICATION NUMBER: US 60/207,456
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Gaps

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       ö
Section 12. Solution US/09764855

Patent No. US20020119919A1

GENERAL INFORMATION:

APPLICANT: ROSen et al.

TITLE OF INVENTION:

FILE REFERENCE: PA110

CURRENT FILIO DATE: 2001-01-17

Prior application data removed - consult PALM or file wrapper

NUMBER OF SEQ ID NOS: 334

SOFTWARE: PatentIN Ver. 2.0

SEQ ID NO 121

LENGTH: 233
                                                                                                                                                                                   or file wrapper
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Length 233;

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        IS COMPOSED OF 2 ALPHA CHAINS, 1 BETA CHAIN, 1 BETA' CHAIN AND 1 OMEGA CHAIN (BY SIMILARITY).

DOMAIN: THE AMINO-TERMINAL PORTION IS INVOLVED IN THE ASSEMBLY OF CORE RAPA, WHEREAS THE CHEMINAL IS INVOLVED IN INTERACTION WITH TRANSCRIPTIONAL REGULATORS (BY SIMILARITY).

SIMILARITY: BELONGS TO THE RNA POLYMERASE ALPHA CHAIN FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            CATALYTIC ACTIVITY: N nucleoside triphosphate = N diphosphate +
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         5.6%; Score 33; DB 1; Length 332; 35.7%; Pred. Phosphatidylinositol 4-kinase PIK1 (EC 2.7.1.67) (PI4-kinase)
                                         t
step. This protein has a weak ATPase activity.
SIMILARITY: BELDONGS TO THE DNA MISMATCH REPAIR WUTS
CAUTION: Ref.1 sequence differs from that shown due frameshifts in positions 353, 379, 394, 422 and 425.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            PRT; 1066 AA.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Ahrens C.H., Russell R.R., Funk C.J., Evans J., Harwood S., Rohrmann G.F.; Funk C.J., Evans J., Harwood S., The harmon G.F.; Funk C.J., Evans J., Harwood S., The orgying pseudotsugata multinucleocapsid nuclear Virology 229:381-399(1997).
                                                                                                                                                                                                                                                                                              THE STATE OF THE PRODUCTION OF THE SECOND MESSENGER COMMITTED STEP IN THE PRODUCTION OF THE SECOND MESSENGER INOSITOL, 1, 4, 5, -7 TRISPHOSPHATE, PIKI IS PART OF A NUCLEAR PHOSPHOINOSTIDE CYCLE AND COULD CONTROL CYTOKINESIS THROUGH THE ACTIN CYTOSKELETON.

-!- CATALYTIC ACTIVITY: ATP + 1-phosphatidyl-1D-myo-inositol = ADP 1-phosphatidyl-1D-myo-inositol 4-phosphate.
-!- SUBCELLULAR LOCATION: Nuclear.
-!- SIMILARITY: BELONGS TO THE PI3/P14-KINASES FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           6

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
